ld: 5523 Nefunkcionalni zahtjevi odgovaraju na pitanje:

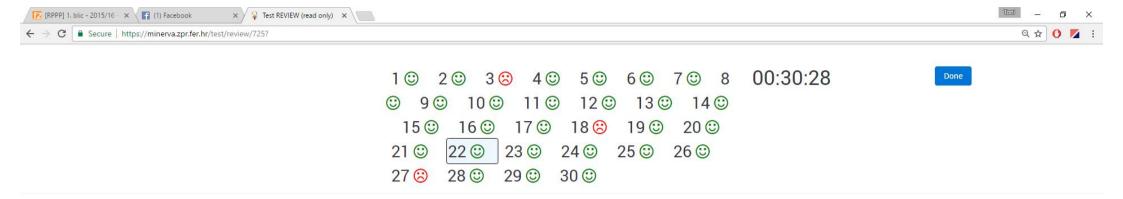

Koja od navedenih tvrdnji nije točna:

ld: 5610 Koja od tvrdnji **nije** istinita:

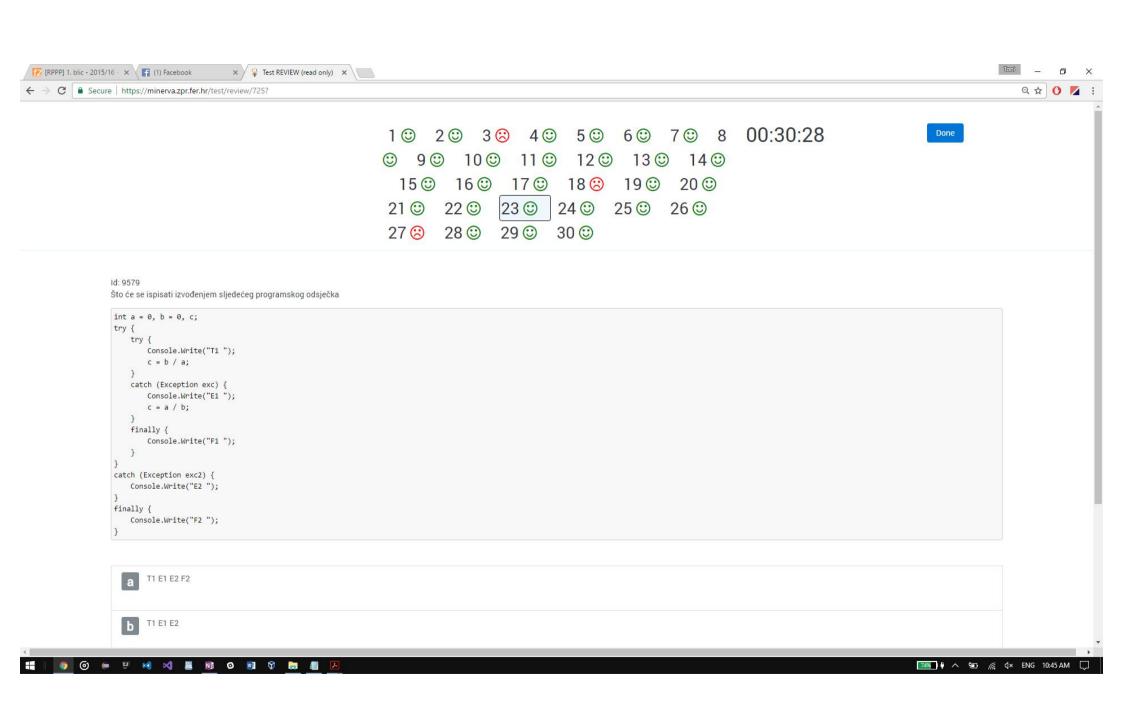

a Za jedan try blok može postojati jedan ili više catch blokova koji obrađuju različite vrste pogrešaka.

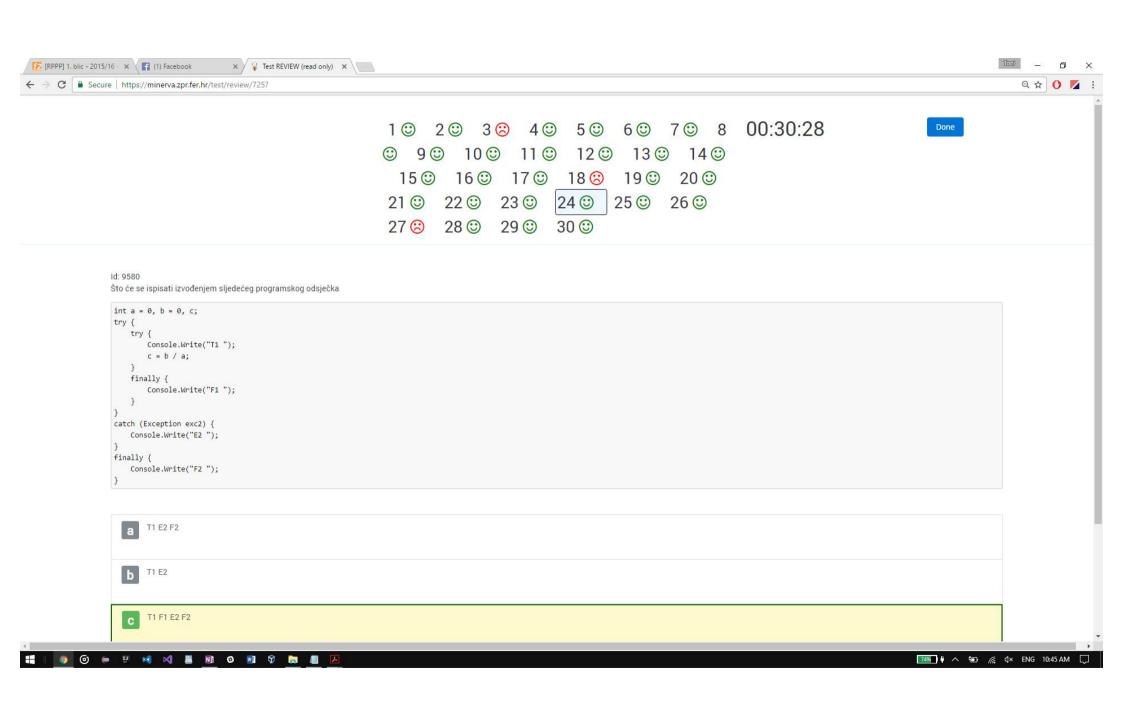

b Može postojati više finally blokova, tj. po jedan za svaki catch blok.

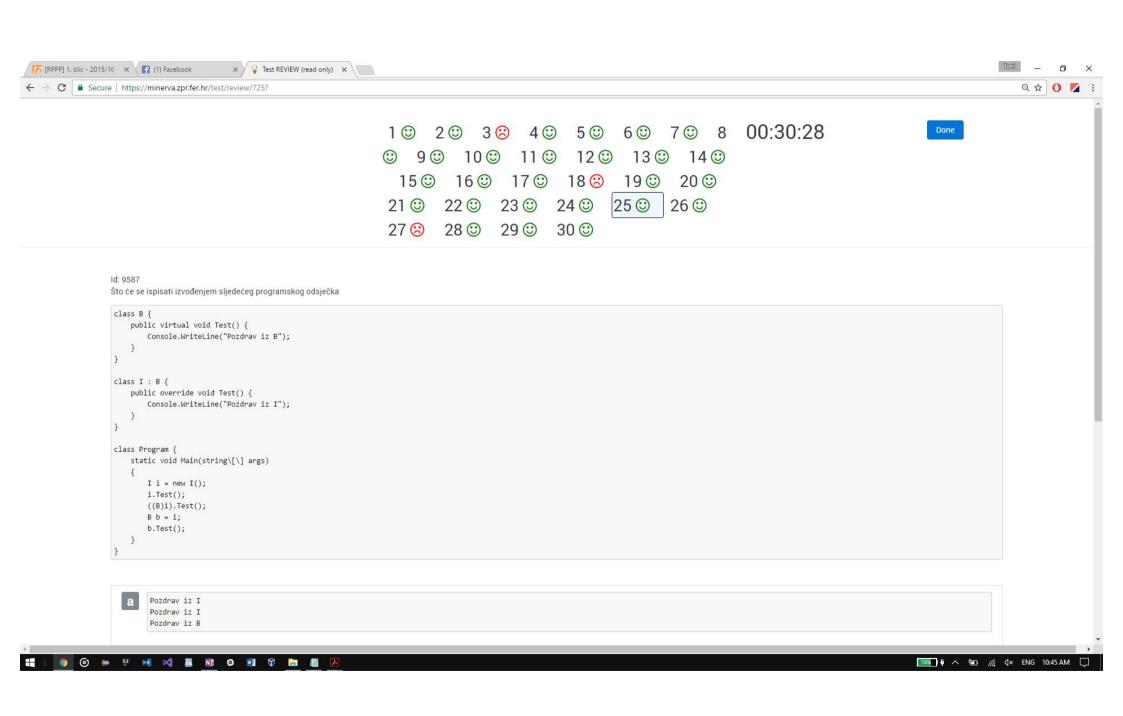

c finally blok se izvodi neovisno o tome da li se dogodila iznimka ili ne.

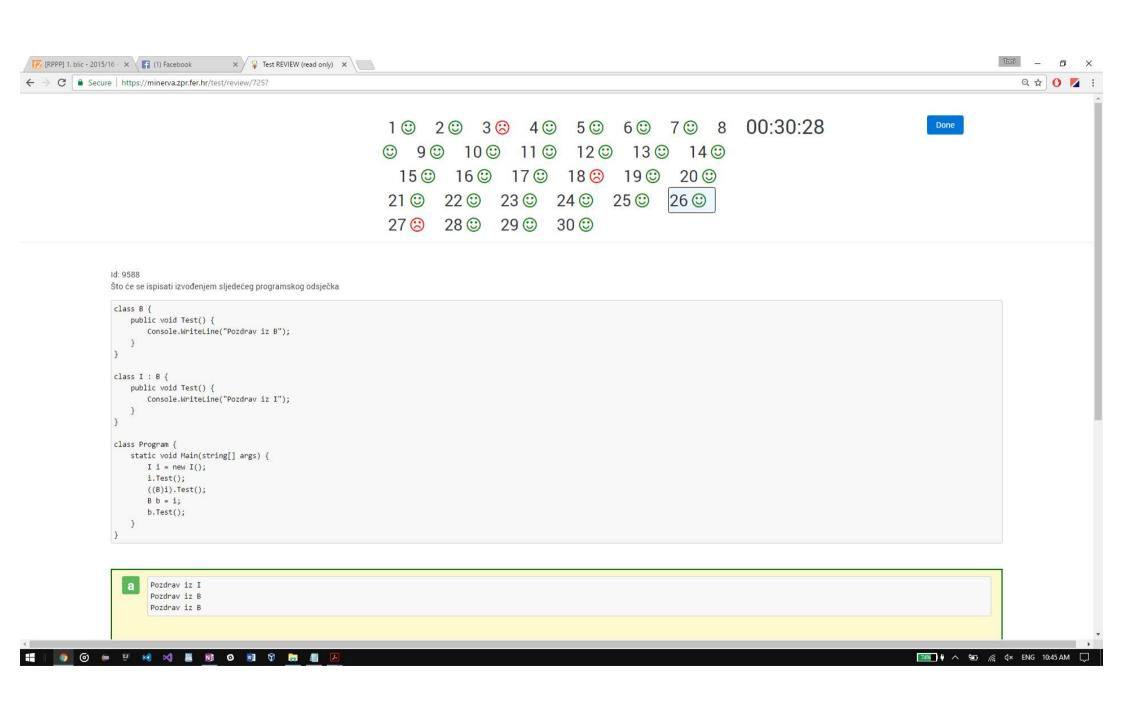

d Kada dođe do pogreške u try bloku, a postoji više catch blokova, obavlja se prvi catch blok koji obrađuje nastali tip iznimke

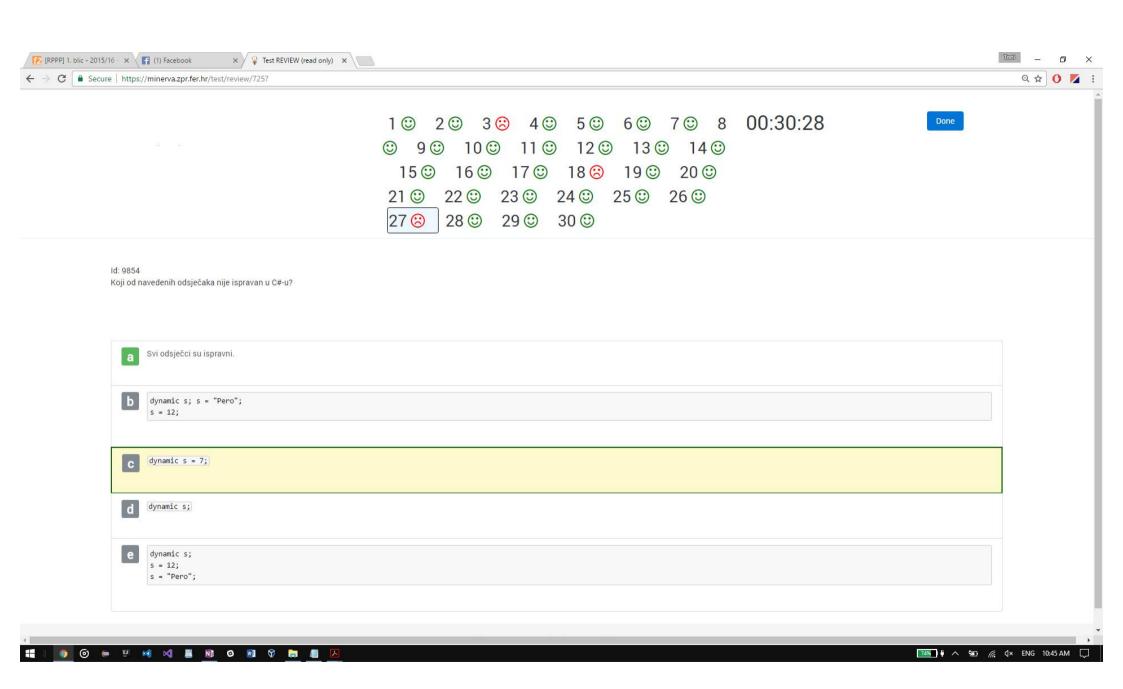

e Ako postoji više catch blokova, posljednji se navodi blok koji obrađuje općenite iznimke (tipa System.Exception)
