

Ako je u bazi podataka odnos među tablicama Partner i Osoba kao na sljedećoj slici tada razred Partner u Entity Framework modelu generiranom prema navednoj BP izgleda nalik

```
public partial class Mjesto {
...
    public string OznDrzave { get; set; }
...
    public virtual Drzava OznDrzaveNavigation { get; set; }
}

public partial class Mjesto {
...
    public string OznDrzave { get; set; }
...
```
